## AC600-S

### Auto Winder

The AC600-S is one of a range of automatic coiling solutions for plastic pipe, tube and profile. The coiler can be readily integrated into existing processes and is available with a wide range of optional equipment including strapping and wrapping systems and automated load / unload equipment.

The machine utilises 'state of art' control technology and is fully CE compliant to ensure that operator safety is a priority.

## Technical Information

Max. coil or reel diameter	600mm
Max. line speed	300m/min (1000feet/min)
Product dimensions	Typically 50mm x 30mm max.
Traverse range	Infinitely variable up to 70mm pitch
Capacity	55kg/coil or reel
Winding tension	Programmable
Length Counting	Repeatable to 0.05%

## Benefits

- Fully automatic changeover at maximum operating speed
- Precision layer winding with automatic pitch compensation
- Compatible with a range of product types and shapes
- Capable of 'asymmetric' winding
- Extensive process recipe storage using PLC technology
- Easy change between reels and coils
- Automatic reel unloading available
- Simple integration with existing extrusion processes
