

**Strand  
Annealing Furnace  
for SS Wire up to  
7.0mm dia**

**Small Annealing  
Systems for Fine  
Wire Processing**

## Ovens & Strand Annealing Furnaces

**Large  
Process Annealers  
with capacities up to  
1000kg/hour**

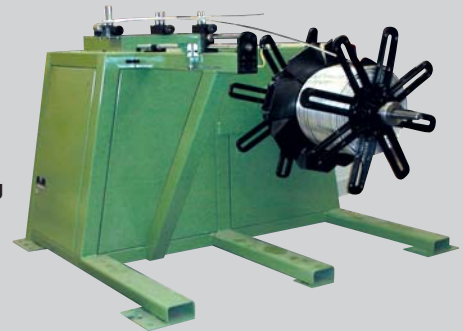

**Driven and Non-driven  
Tension Controlled Pay-Offs**

**The widest possible  
range of Spooling  
and Coiling Options**

**The widest  
possible  
range of  
Spooling  
and Coiling  
Options**

## Infrared and Air Curing Ovens

Meltech is the leading international supplier of Strand Annealing Furnaces and systems to the wire industry. With equipment in operation in many countries around the world, Meltech offers full line turnkey capability across a wide range of wire products and sizes. Recognised as a major supplier to the Stainless Steel wire industry Meltech also designs and builds equipment for the processing of Copper alloys, Nickel alloys, precious metals and other highly specialised materials such as mineral insulated cables and, products for the lighting industry. In order to satisfy the needs of these diverse branches of the wire processing industry, we offer a range of machinery solutions which includes small self-contained annealing lines with integral spooling, right through to large scale process annealers with capacities in excess of one tonne per hour.

**Silicone
